B.E. Electronics and Communication Engineering | E.G.S. Pillay Engineering College (Autonomous) | Regulations2019 Approved in IV Academic Council Meeting held on 25-05-2019

E.G.S. PILLAY ENGINEERING COLLEGE(Autonomous)

Approved by AICTE, New Delhi | Affiliated to Anna University, Chennai |

Accredited by NAAC with 'A'Grade |Accredited by NBA (CIVIL, CSE, ECE, EEE, IT, MECH)

NAGAPATTINAM - 611 002

B.E ELECTRONICS AND COMMUNICATION ENGINEERING <u>Full Time Curriculum And Svllabus</u>

1902EC403	ELECTROMAGNETIC FIELDS	Т	Р	С	
		3	0	0	3
Course Objective	s:	•	Ŭ	Ŭ	
	1. To impart knowledge on the basics of static electric and ma laws.	gnetic fie	eld and	the asso	ociated
	2. To give insight into the propagation of EM waves and also to computational electromagnetic.	o introdu	ce the n	nethods	in
	3. To analyze the time varying fields.				
UNIT I	STATIC ELECTRIC FIELDS			9	Hours
theorem and div intensity– Electr	em – Rectangular – Cylindrical and spherical co-ordinate s vergence theorem –Coulomb's law in vector form – I ic field due to charges distributed uniformly on an infini of a uniformly charged circular disc – Electric flux Dens ications.	Definitio te and f	on of e inite li	electric ne – E	field lectric
UNIT II	STATIC MAGNETIC FIELDS			9	Hours
a current I – M current I – Ampe equation for a m dinamagnetic fiel		rectangu density a curren	lar loo –The l t I plac	p carry Lorentz xe	ying a z force
UNIT III	ELECTRIC AND MAGNETIC FIELDS IN MATE	ERIALS		9	Hours
Inductance of lo fields. UNIT IV Faraday's law –	 Current density – Continuity equation for current – ops and solenoids – Definition of mutual inductance – H TIME VARYING ELECTRIC AND MAGNETIC I Maxwell's equations in integral form and point form al law in integral form –Modified form of ampere's circulation 	Energy c FIELDS – Disp	lensity laceme	in mag 9 ent cur	gnetic Hours rent –
equation in integ	ral form – Pointing vector and the flow of power – Powe erage and complex pointing vector.				
UNIT V	ELECTROMAGNETIC WAVES			9	Hours
homogenous mat Propagation in g	ave equation–Wave equation in phasor form – Plane w terial – Wave equation for a conducting medium – Plane bod conductors – Skin effect – Linear elliptical and circul om a conductor–Normal incidence - Dependence on polariz	waves i ar polari	in lossy	y dieleo – Refle er angle	ctrics– ection
Further Reading		otun		10	liouis
	Vector analysis - Vector Calculus -Principle of Superposi magnetic materials – Magnetization and permeability – M conditions.				of
Course Outcomes					
	After completion of the course, Student will be able to 1. Explain the fundamentals of electromagnetic.				
	 2. Analyze field potentials due to static changes and static 	magnet	ic field	s	
	3. Explain how materials affect electric and magnetic fiel			U .	
	4. Analyze the relation between the fields under time vary		ations	P	age o or i
	5. Discuss the principles of propagation of uniform plane

1902EC405		L	Т	Р	С
1902EC403	MICROPROCESSOR AND MICROCONTROLLER	3	0	0	$\frac{c}{3}$
Course Object	ctives:				
	1. To teach the architecture and functions of 8085 and 8086 Mid	cropro	cesso	rs.	
	2. To impart the concepts of 8051 microcontroller.				
	3. To convey aspects of I/O and Memory Interfacing circuits.				
UNIT I	INTRODUCTION TO MICROPROCESSORS	9	Hou	rs	
Evolution Of I	Microprocessors - 8-Bit Processor - 8085 Architecture, Register Org	ganiza	tion,	Instru	ction
	Diagram, Addressing Modes, Interrupts, Interrupt Service Routines-	Asse	mbly	Lang	uage
Programming					
UNIT II	8086 MICROPROCESSORS		Hou		
	p 8086 – Microprocessor architecture – Addressing modes - Instruc				
	ssembly language programming – Modular Programming - Linking		Reloc	ation	-
	dures - Macros - Interrupts and interrupt service routines - 8086 si	-			
UNIT III	MICROCONTROLLERS		Hou		
	f 8051 – Special Function Registers (SFRs) - I/O Pins Ports and Cir	rcuits	- Inst	ructio	n set
<u> </u>	nodes - Assembly language programming.				
UNIT IV	I/O INTERFACING		Hou		
interface – D/	facing and I/O interfacing - Parallel communication interface – Seri A and A/D Interface - Timer – Keyboard /display controller – Inter				
controller	A DVA NOED MICDOBDOCESSOD 8		TT		
UNIT V	ADVANCED MICROPROCESSOR & MICROCONTROLLER	9	Hou	rs	
Advanced co	processor Architectures- 286, 486, Pentium -RISC Processors- I		Ve C		PISC
	d evolution- ARM Processor fundamentals, ARM Architectur				
	eptions and interrupts interrupt vector table, ARM instruction set				
	ctions, load store instructions.	 1	Jala	proces	sing,
	Total:	4	5 Ho	urs	
Further Read	ling:				
	1. Raspberry pi				
	2. Machine learning using raspberry pi				
Course Outco	omes:				
	After completion of the course, Student will be able to				
	1. Construct hardware, software and programming concepts	of Mic	ropro	ocesso	r
	2. Summarize architecture, instructions and addressir Microprocessor	ng m	odes	of	8086
	3. Describe addressing modes, Architecture, pins of 8051 Mi	croco	ntroll	er	
	4. Illustrate interfacing of Serial, parallel, Keyboard, Display	with]	Micro	ocontr	oller
	5. Use the programming concepts to write assembly language	e prog	rams

LABORATORY COURSE

1902EC451	ELECTRONICS AND INTEGRATED CIRCUITS LABORATORY	L	Т	Р	C
		0	0	2	1
Course Objectives:					
	1. To understand the basics of Analog integrated Ics.	circuit	ts and a	availab	le
	2. To gain hands on experience in designing Ana	log int	egrate	d circu	its.
	3. To learn PSPICE software used in circuit desi	gn.			
	4. To apply operational amplifiers in linear and r	non-lin	ear app	olicatio	ons.
	XPERIMENTS:				
DESIGN, S	IMULATION AND IMPLEMENTATION OF				
1. Inver	ing, Non inverting and Differential amplifiers.				
2. Integr	ator and Differentiator.				
3. Instru	mentation amplifier				
4. Activ	e low-pass, High-pass, band-pass, and Band stop filter	s.			
5. Astab	le& Monostable multivibrators and Schmitt Trigger				
6. Phase	shift and Wien bridge Oscillator				
7. Astab	le and monostable multivibrators using NE555 Timer				
8. PLL 0	characteristics and its use as Frequency Multiplier.				
9. RPS j	power supply using LM317 and LM723.				
MINI PROJ	IECT:				
Mini project	using Op-Amp and Specialized IC's.				
	vare/Software Required				
1.CRO (Min	30MHz) – 15 Nos.				
2. Signal Ge	nerator /Function Generators (2 MHz) – 15 Nos.				
3. Dual Regi	lated Power Supplies $(0 - 30V) - 15$ Nos.				

B.E. Electronics and Communication Engineering | E.G.S. Pillay Engineering College (Autonomous) | Regulations2019 Approved in IV Academic Council Meeting held on 25-05-2019

		regulations		I V I Ioudol		leeting held on 25-05-201

					TOTAL	45 HOURS
Course Outcomes:						
	After	completion of th	ne course, Stud	ent will b	e able to	
	1.	Design oscillat	ors and amplifi	ers using	operational	amplifiers.
	2.	Design filters response.	using Op-amp	and per	form exper	iment on frequency
	3.	Analyse the wo	orking of PLL a	and use P	LL as freque	ency multiplier.
	4.	Design Regula	ted power supp	ly using	ICs.	
	5.	Analyse the PSPICE	performance of	of oscilla	ators and r	nultivibrators using

1902EC452		Microprocessors and Microcontrollers Laboratory	L	Т	Р	С
	_		0	0	4	2
		(Common to B.E / B.Tech – ECE,CSE & IT)				
Course Objectiv	ves:	The student should be made to:				
		ite ALP for arithmetic and logical operations in 8085, 8086 and	8051			
	2. Dif	ferentiate Serial and Parallel Interface				
		erface different I/Os with Microprocessors& Microcontrollers				
	4. Be	familiar with MASM				
List of Experime						
8085 Programs						
1. Basic arithm						
2. Basic Logica						
3. Ascending an	nd descent	ding				
4. Maximum ar						
8086 Programs						
5. Move a data						
		ns, string manipulations				
7. Code conver						
8. sorting and s						
8051 Experimen						
		ogical operations				
		gram, Find 2's complement of a number				
Peripherals and		ng Experiments				
11. Traffic light						
12. Stepper moto						
13. Key board E	Display					
14. Serial interfa	ice and Pai	rallel interface and Printer status.				

15. A/D and D/A	interface	and Waveform Generation				
			Total:	45 Hours		
Additional Exper	riments:	https://www.intel.in				
	Basic exp	periments using Arduino processor				
Course Outcome	es:					
	After con	npletion of the course, Student will be able to				
	1. Wri	te ALP Programmes for fixed and Floating Point and Arithmetic				
	2. Interface different I/Os with processor					
	3. Generate waveforms using Microprocessors&Execute Programs in 8051					
	4. Exp	lain the difference between simulator and Emulator				

1904GE451		L	Т	Р	С	
	LIFE SKILLS - REASONING	0	0	2	0	
Course Obje	ctives:					
	1. To help students comprehend and use vocabulary words in their day to day communication.					
	2. To apply appropriate reading strategies for interpreting technica documents used in job-related settings					
	3. To ensure students will be able to use targeted grammatical stru and appropriately in oral and written production					
	4. To enable the students to arrange the sentences in meaningful u whether constructions rely on active or passive voice	init a	nd to	detei	mine	
	5. To Apply the principles of effective business writing to hone co	mmu	nicati	ion sk	tills	
-	6. To apply the principles of business etiquettes and Market survey	ying.				
UNIT I	VOCABULARY USAGE	6	Hou	rs		
	- Synonyms and Antonyms based on Technical terms – Single word Sul Audio and video listening activity.	ostitu	tion –	-		
UNIT II	COMPREHENSION ABILITY	6	Hou	rs		
	nd Scanning – Social Science passages – Business and Economics passage event based passages – Theme detection – Deriving conclusion from pass		latest	t polit	ical	
UNIT III	BASIC GRAMMAR AND ERROR DETECTION		Hou	rs		
	Redundancy – Ambiguity – Concord - Common Errors – Spotting Error tt– Error Detection FAQ in Competitive exams.	s - S	enten	ce		
UNIT IV	REARRANGEMENT AND GENERAL USAGE	6	Hou	rs		
Jumble Sent	ences – Cloze Test - Idioms and Phrases – Active and passive voice – Sp	elling	g test.			
UNIT V	APPLICATION OF VERBAL ABILITY	6	Hou	rs		
Business Wi	riting - Business Vocabulary - Delivering Good / Bad News - Media Cor	nmun	icatio	on - E	mail	
Etiquette – H	Report Writing - Proposal writing – Essay writing– Indexing – Market sur	rveyir	ng.			
	Total: 3	30 Ho	urs			
Course Outc						
	After completion of the course, Student will be able to					
	1. Construct new words in their day to day communication.					
	2. Predict the information swiftly while reading passages.					
	3. Elaborate their oral and written communication.					

	4. Rephrase the sentences and able to identify the voice of the sentence.
	5. Summarize their knowledge of the best practices to craft effective business
	documents
	6. Make use of the etiquettes in business.
